

Steve Clarke
Cell Media

Dear Steve,

I would like to take this opportunity to thank your company for the development of our Safe working in a Confined Space Training Package. The development of this package was trialled during our CSBP Wesfarmers 17 million Ammonia Plant major upgrade/ mechanical shutdown.

During the shutdown the above-mentioned package was utilised to train 400 employees and contractors in Safe working in confined spaces for the shutdown.

The package was successful for several reasons, firstly we had a guaranteed consistency of training to all persons and secondly the cost savings to us in not having to provide a training officer for the duration of the course, we have calculated that it has saved us over double the original cost of the package.

After each course was completed we obtained feedback from the students, below are just some of the comments that we continually received:

- Great training easy to follow and very descriptive (Thiess Scaffolder).
- Good use of visual effects to highlight a difficult subject (Matricon Electrician).
- An Interactive test is the way to go (CSBP Engineer).

Again I thank you and Mike for all your efforts, and look forward to a long and healthy association with your company.

Sincerely,

Brendon Vagg
Safety and Health Advisor
