Steve

Our other inductions are fantastic, I know I can leave them with it and go back an hour later with a full assessment done and there have been no break downs. Already that was a plus from the last induction we had.

- Consequently that saves my and the contractor's time.
- Safety benefits - it is current, crosses the new isolation rules, smoking regulations, tagging, reporting of events, etc which equates to a safer workplace.
- Admin benefits - the paper work is complete on completion of the induction - no chasing up (another time saver)
- The 5minute visitors induction and a great small package of the site overall, we have it attached to our portal for all user access.

I have been asked on a few occasions who produced the DVD, in particular some BHPB auditors we had recently, and I have passed on your contact details. Really complimentary comments.

Many contractors are remarking that they have had to do many inductions and ours is one of the best and easiest to understand.

All up Steve - it is great.

Many thanks
